

RFID TAGS

High-Temperature RFID Tag — Datasheet

Tags that survive autoclaves, ovens and paint lines.

High-temperature RFID tags use PPS, ceramic or PCB housings to keep working through heat-intensive processes — autoclaves, paint-curing ovens and industrial washing — where standard tags would fail. Available up to 260 °C continuous.

Specifications

Frequency	HF / UHF
Material	PPS / ceramic / FR4
Temperature	Up to 230–260 °C
Rating	IP68
Mounting	Screw / adhesive / embed

Applications

Automotive paint lines · Sterilization / autoclave · Metalworking · Industrial laundry

Why RFID MFG

- Since 1996 — nearly three decades in RFID & smart-card manufacturing
- 20,000 m² ISO-certified facility with six production lines
- First-hand chip sourcing for stable supply and sharp pricing
- Full OEM / ODM, custom encoding under NDA
- Exports to 100+ countries · samples available · 2-year warranty
